ANUJ BHARAT GADEKAR

Software Development Engineer (Fresher) | Full Stack Developer (.NET, MERN)

Pune, Maharashtra | +91 96578 47353 | anujgadekar688@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Final-year Computer Engineering student (CGPA 9.19) with hands-on industry experience as a Full Stack Development Intern, delivering a CRM and multiple client web applications used in live business operations. Skilled in ASP.NET, C#, React.js, TypeScript, and the MERN stack, with additional experience in PHP, Spring Boot, React Native, and Flutter. Strong foundation in data structures, algorithms, and scalable system design. Known for owning features end-to-end, from requirement to deployment, and for learning new technologies quickly. Seeking an SDE role at Amazon to build customer-focused, scalable products.

EDUCATION

B.E. Computer Engineering | Pune University, Pune
CGPA: 9.19 | Expected 2027

Higher Secondary Certificate (HSC) | Maharashtra State Board
70% | 2023

Secondary School Certificate (SSC) | Maharashtra State Board
91.20% | 2021

TECHNICAL SKILLS

Languages: C#, Python, Java, C++, JavaScript, TypeScript, PHP, Dart, SQL

Backend & Frameworks: ASP.NET, .NET, C#, Node.js, Express.js, Spring Boot, Hibernate, REST API design, authentication and authorization

Frontend & Mobile: React.js, Next.js, Vue.js, Redux Toolkit, Tailwind CSS, React Native, Flutter, WordPress, Elementor

Databases & Cloud: MongoDB, MySQL, Firebase (Authentication, Firestore, Realtime Database), Vercel, cPanel

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, System Design basics

AI & Data: NumPy, pandas, scikit-learn, prompt engineering, LLM tools and AI-agent workflows (Claude, Gemini, ChatGPT, n8n, NotebookLM)

Tools: Git, GitLab, Postman, Jira, Confluence, VS Code

WORK EXPERIENCE

Full Stack Development Intern | Britwise Technologies Pvt. Ltd., Pune
October 2025 – Present

- Deliver full stack features and client projects end-to-end, from requirements and REST API design through to production deployment, across .NET, MERN, PHP, and CMS-based platforms.
- Build and launch web applications for clients, covering the frontend, backend, database, and hosting.

CRM for Travel Business | *React, Node.js, Express.js, Redux Toolkit, TypeScript, Tailwind CSS, Firebase*

- Built a CRM to manage customer queries, follow-ups, and tour activities, replacing manual tracking and improving follow-up visibility for the sales team.
- Delivered features on the MERN stack end-to-end, from REST API design to production deployment.

GetSetGo Travel Booking Website | *WordPress, Elementor*

- Designed and launched a travel booking website from client requirements.
- Built a responsive and SEO-friendly site to improve online visibility and the booking experience.

RIIM College Software | *Next.js*

- Developed college software using Next.js, handling the project from requirements through to deployment.

Multiple Business Websites | *PHP, cPanel, Vercel*

- Developed multiple websites using PHP and deployed them on cPanel hosting and Vercel.

Dynamic Travel Booking Software | *ASP.NET, C#, .NET, React.js, TypeScript*

- Built dynamic travel booking software using ASP.NET, C#, and .NET, with a React.js and TypeScript frontend.

- Worked in an agile team using Git, GitLab, Postman, Jira, and Confluence, and took part in code reviews, sprint planning, and release workflows.

PROJECTS

Student Management System | *.NET, C#*

- Developed a student management application using .NET and C# to manage student records and related data.

Employee Management System | *Next.js, TypeScript, Tailwind CSS, Firebase*

- Built a role-based system with separate admin and employee dashboards for assigning work and tracking task status in real time.

Travel Booking Platform | *Spring Boot, Vue.js, MySQL, Hibernate*

- Designed REST APIs for destination management and bookings with a normalized MySQL schema and Hibernate ORM for persistent storage.

Crop Selling Mobile App | *Flutter, Node.js, Firebase*

- Built a farmer-to-buyer marketplace with crop listings, price and quantity management, and real-time data sync from a single cross-platform codebase.

Product Management App | *React, TypeScript, Redux Toolkit, Firestore*

- Built product CRUD operations with authentication, protected routes, and async state management using Redux Toolkit.

AI-Based Chess Game | *Python*

- Built a chess game with an AI opponent that evaluates board positions and selects moves using search-based logic.

ACHIEVEMENTS & ACTIVITIES

- Chess Master at the college level (2024, 2025), demonstrating strategic thinking, patience under pressure, and quick decision-making.
- Certified in Generative AI and AI tools (Claude, Gemini, ChatGPT, Whisper Flow, Stitch AI, NotebookLM, n8n); Spoken Tutorial project, IIT Bombay.
- Volunteer at the college fest and Pune Marathon 2025, coordinating with teams and handling on-ground responsibilities.
